SIDE SPREAD CONTROL

Your EarthWay spreader includes a feature called side spread control. This feature turns off fertilizer from being spread to the left side. To activate this feature, slide the lever below the hopper to the right (if standing behind the spreader) and walk along a sidewalk or flowerbed that is 12"-14" on your left side. Fertilizer will not spread to the left. This feature is better than a deflector as no material is wasted by the deflector.
