Replacement Fuel Pump Module Kits

Kohler has released a new design fuel pump module. Due to slight differences in size and fit, the original fuel pump module 25 393 16-S and previous versions, need to be replaced with one of the following kits that include the 25 393 19-S fuel pump module.

Models	Fuel Pump Module Kit
ECV850-880	19 755 24-S
EKT740-750, EZT715-750	25 755 74-S
ECH440, ECH/ECV630-749, ECH/ECV940-980	25 755 73-S

These kits include installation instructions that show the two fuel pump module designs to identify if you must perform an interference inspection between the new fuel pump module and the existing mounting bracket.

Order these new kits from your source of supply.
